# Hawa Concepta III for wooden folding/sliding doors Flowing transitions make rooms more flexible than ever before

Hawa Concepta III supports the trend towards open living spaces, and creates transitions from kitchen to living room or from workplace to living area in a more fluid way than ever before.

Doors of any size can be pivoted, slid in sideways and parked in an extremely small space, almost in the blink of an eye.

They can then be brought out again with a gentle tap and closed flush with the surface, so that all that remains visible of the kitchen is an aesthetic front. This works so easily and intuitively that it is even possible to dispense with handles.

We weren't just thinking about the users during the development of the Hawa Concepta III: The system impresses with its simplicity, even during installation and adjustment. This is all based on technology that is just as invisible as a kitchen that is currently not in use.

#### Area of application

Cabinet constructions for multi-functional use of rooms which contain kitchens, home offices, washer/dryer combinations and storage space, which are freely accessible and disappear behind the cabinet front with pivot / slide-in hardware if required.

#### System advantages

Flexibility Variable door dimensions: half-height to floor-to-ceiling solutions

possible, including walk-on solutions

Productivity Easy installation thanks to high degree of pre-assembly

Intuitive adjustment with easily accessible adjustment points

Comfort Ergonomic movement support for even, smooth movement

Opening and closing with very little effort - one hand is enough

Uniform, flush front design with even gap pattern

Allows constructions with and without a handle - the technology

remains invisible

#### **Technical specifications**

max. 25/35 kg

1200 – 2700 mm

<del>←→</del> 440 – 750 mm
